

Converting ebooks to use within a VLE

This guide will show you how to convert your ebooks so that you can put them in your VLE. You could upload them just as a pdf, but by doing this, the children would be able to download them and use them elsewhere, possibly breaking your license. Please check your license before following this guide. The e-books provided free at TeachMeet East give you the ability to upload them to a VLE.

To do this you will need an account from one of the following services: Google, Twitter, Wordpress, Yaaoo or AOL. These are all free to sign-up to. Google is probably the easiest, visit www.google.co.uk and click 'sign-in' in the top-right hand corner, then 'Create an account'.

<p>Visit the embedit.in website: http://www.embedit.in</p>	
<p>Press Select Files and find your pdf ebook. Please note, this will not work if you have e-books in other formats such as Microsoft Reader.</p>	
<p>Sign-in using your account from one of these services.</p>	

On this page, you can edit your book. Change the width to 500-700 and the height to 650.

To comply with your license, I suggest you turn off the print, download and public settings.

As you make changes, the page will update so you can see how it looks before you embed it.

Once finished, copy the code in the 'Embed Code' box (arrowed)

The screenshot shows the Embedit.in interface for a video titled "Natural disasters". The interface has three tabs: "View", "Customize", and "Analytics". The "Customize" tab is active, showing options for "Appearance" (Embed, Thumb, Link), "Background Color" (set to #ffffff), "Width" (466 pixels), and "Height" (400 pixels). There are also "Privacy Settings" (Allow Print, Allow Download, Make Public) and an "Add Markup" section with "Start Drawing" and "Erase" buttons. The "Embed Code" section is highlighted with a black arrow and contains the code: `<embed src="http://embedit.in/MKv5nigfud.swf" height="400" width="466">`. A "Copy to Clipboard" button is next to the code. Below the code is a preview of the video player showing the title "DOWNLOAD" and "NATURAL DISASTERS" over a red, fiery background. The video player has a search bar, a "1 of 51" indicator, and a "POWERED BY BOOKNET BOX" logo.

You can embed the embed code in any website (but make sure you check the licence for your e-books) but to embed them into the Norfolk Primary VLE:-

Log in your VLE and choose 'Create a new property' from the property menu.

Select 'DIY' Property

Give it a name, and fill in all the usual details!

Click to set your sharing permissions if needed.

When the editor appears- click on the button that says HTML and paste in the embed code from embedit.in. If you want to add any text (perhaps questions etc) then you can do this here too!

Click save- and your property will be created

Click 'add to class' and select which classes you wish to add the e-book too!

You should also be able to add the e-book to E-learning Folios on the VLE.
